The first template, 'School Education', is highlighted with an orange arrow. It has a blue header with the title 'School Education' and a main content area with a grid of images and text. The other templates include 'Play School', 'Music School', 'Military School', 'Aviation School', and 'Special School'.

Setup Intranet Website 10 In dit voorbeeld kiezen we de eerste template die tevoorschijn komt. Klik op deze template.

« [PhotoTeam Template](#) | [Templates](#) | [Simolio Template](#) »

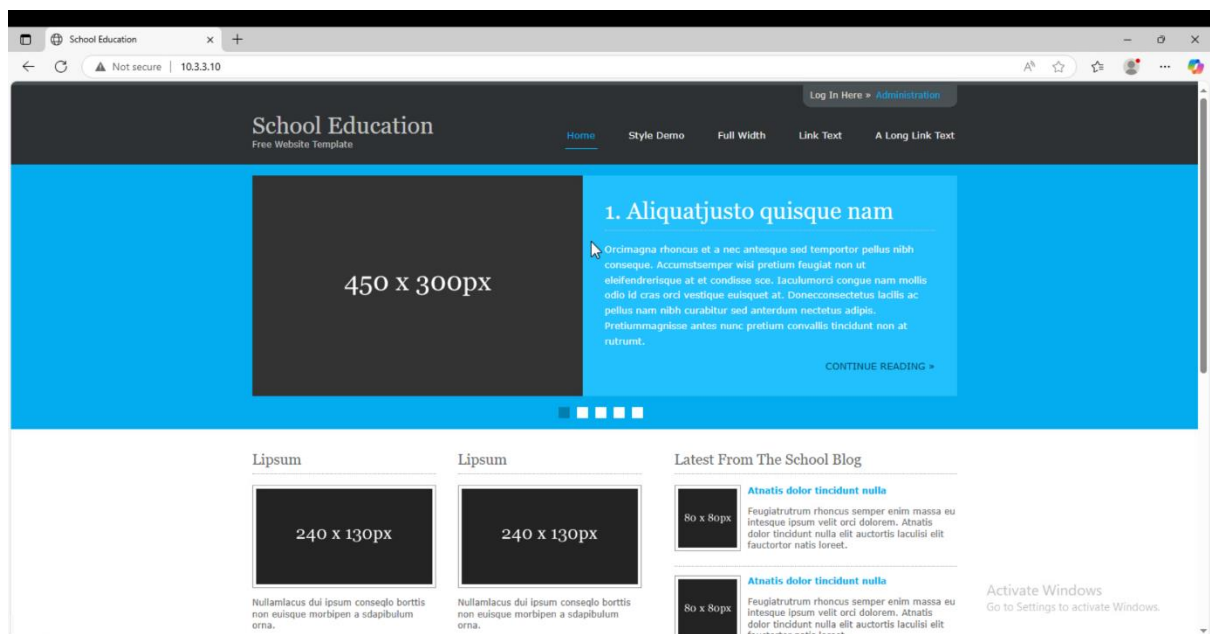

Setup Intranet Website 41 Klik op "Download".

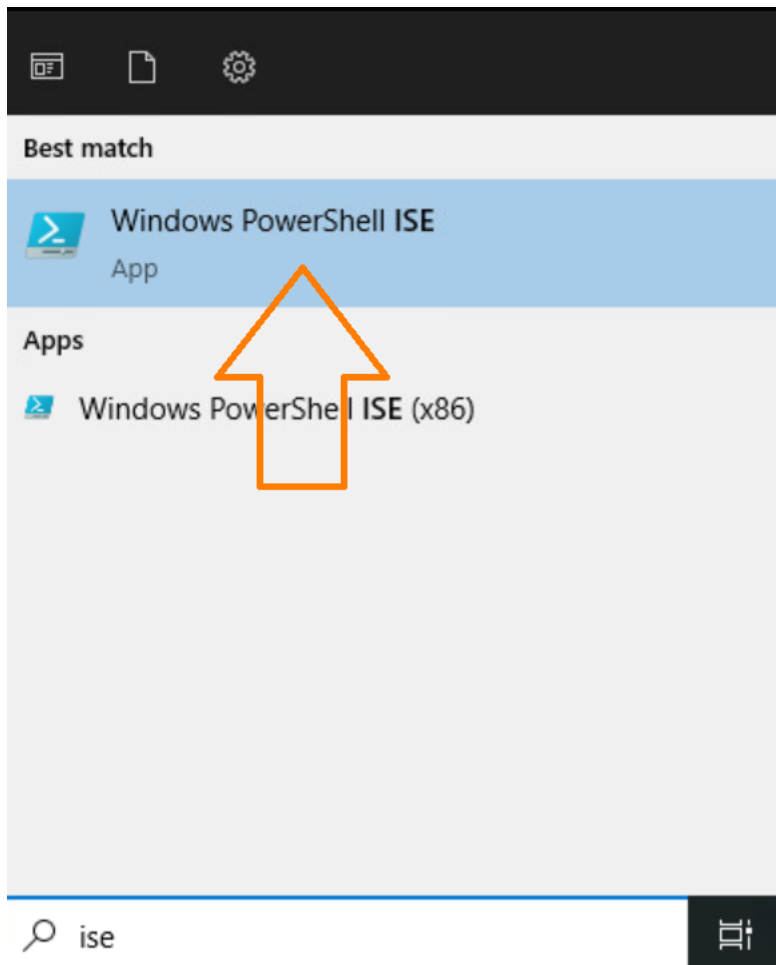

Setup Intranet Website 42 Sleep de bestanden/folders van de css template naar de map "C:\inetpub\wwwroot" en verwijder de oude bestanden. Dit is de standaardlocatie waar de webpage van de intranet server gelezen wordt. We kunnen dit in de IIS manager veranderen maar in dit voorbeeld doen we dit niet.

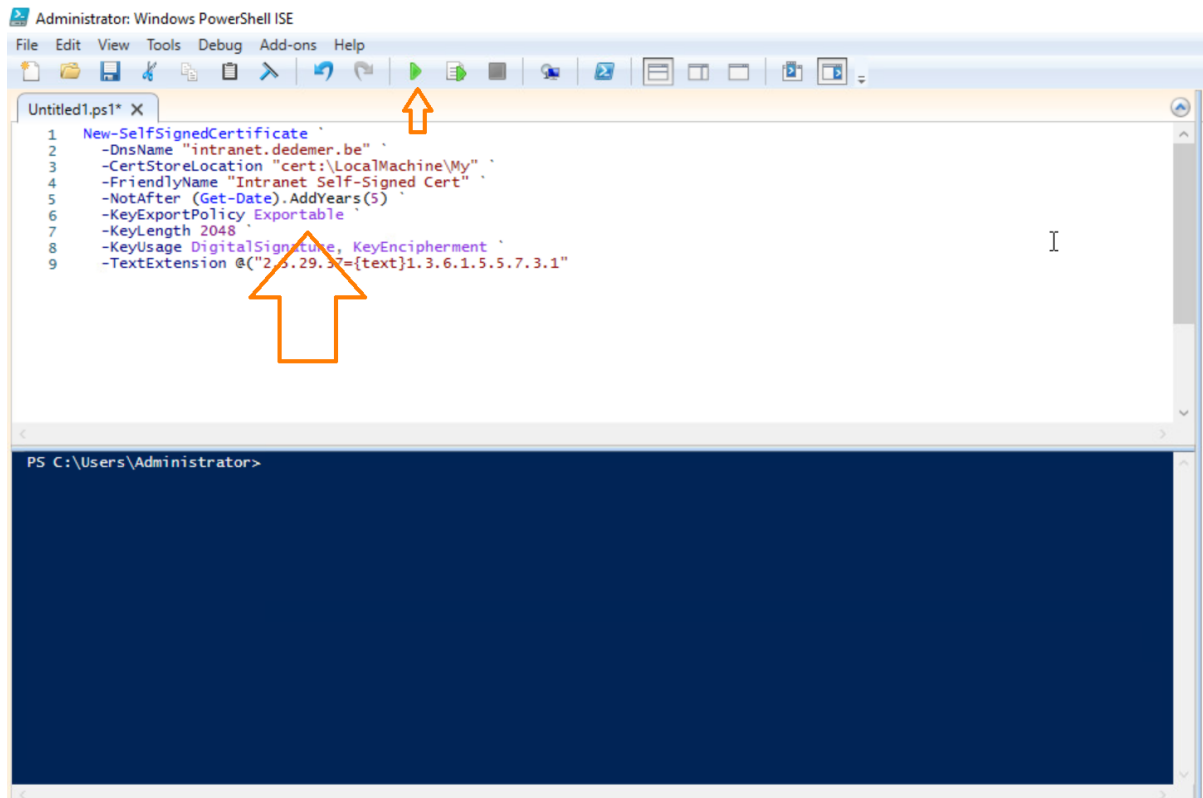

Setup Intranet Website 43 Surf nu terug naar de IIS server IP over HTTP.

Setup Intranet Website 44 We zien nu onze CSS template tevoorschijn komen.

Setup Intranet Website 45 Ga naar de zoekbalk en zoek voor "Powershell ISE".

Setup Intranet Website 46 We gaan nu ons eigen self-signed certificaat creëren via powershell. Gebruik dit volgende script:

`New-SelfSignedCertificate ``

`-DnsName "intranet.dedemer.be" ``

`-CertStoreLocation "cert:\LocalMachine\My" ``

`-FriendlyName "Intranet Self-Signed Cert" ``

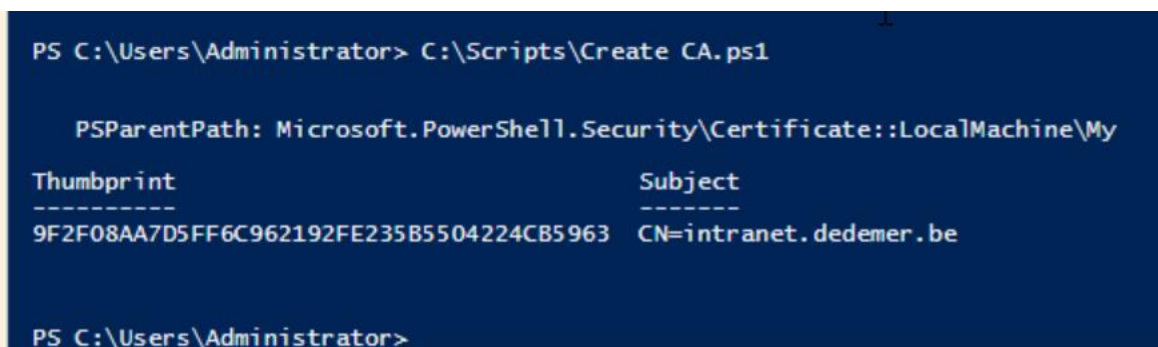

`-NotAfter (Get-Date).AddYears(5) ``

`-KeyExportPolicy Exportable ``

`-KeyLength 2048 ``

`-KeyUsage DigitalSignature, KeyEncipherment ``

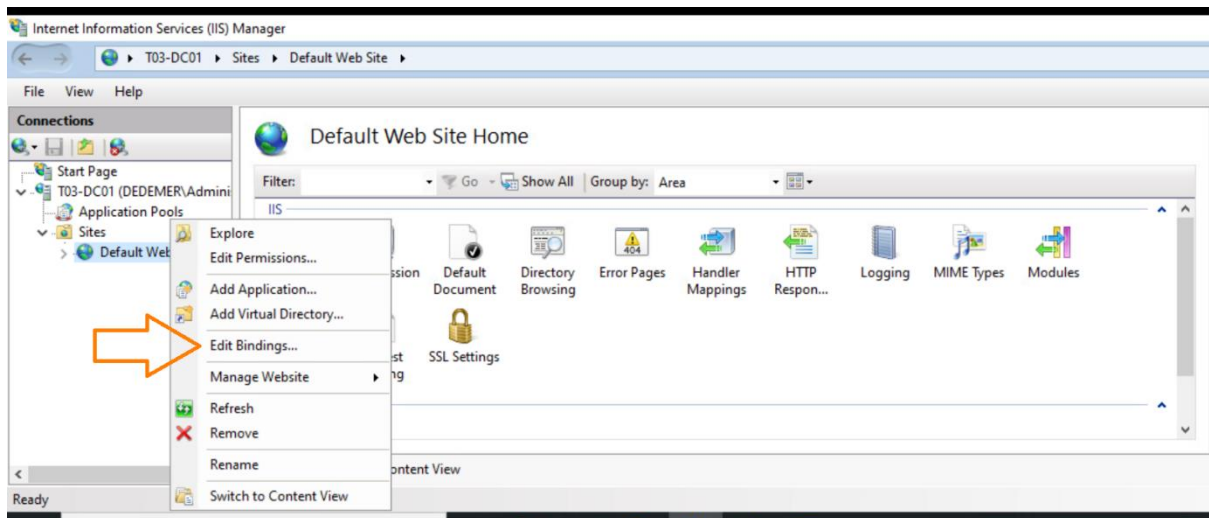

`-TextExtension @("2.5.29.37={text}1.3.6.1.5.5.7.3.1")`

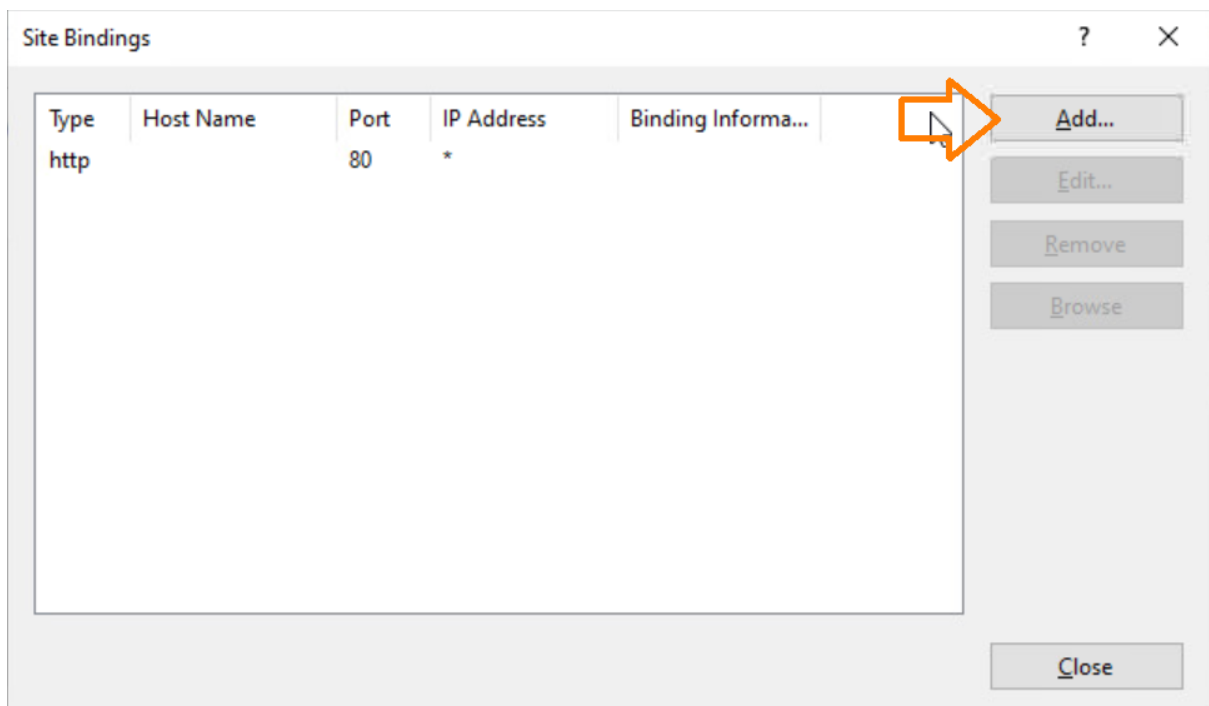

Setup Intranet Website 47 Als het script correct is uitgevoerd krijg je volgende output.

Server Certificates				
Use this feature to request and manage certificates that the Web server can use with websites configured for SSL.				
Filter:	Go	Show All	Group by:	No Grouping
Name	Issued To	Issued By	Expiration Date	Certificate Hash
	dedemer.ticket	dedemer.ticket	4/6/2026 8:04:48 PM	7DA75DC36FD8032AF2A01C3...
Intranet Self-Signed Cert	intranet.dedemer.be	intranet.dedemer.be	5/9/2030 9:38:31 A...	9F2F08AA7D5FF6C962192FE2...

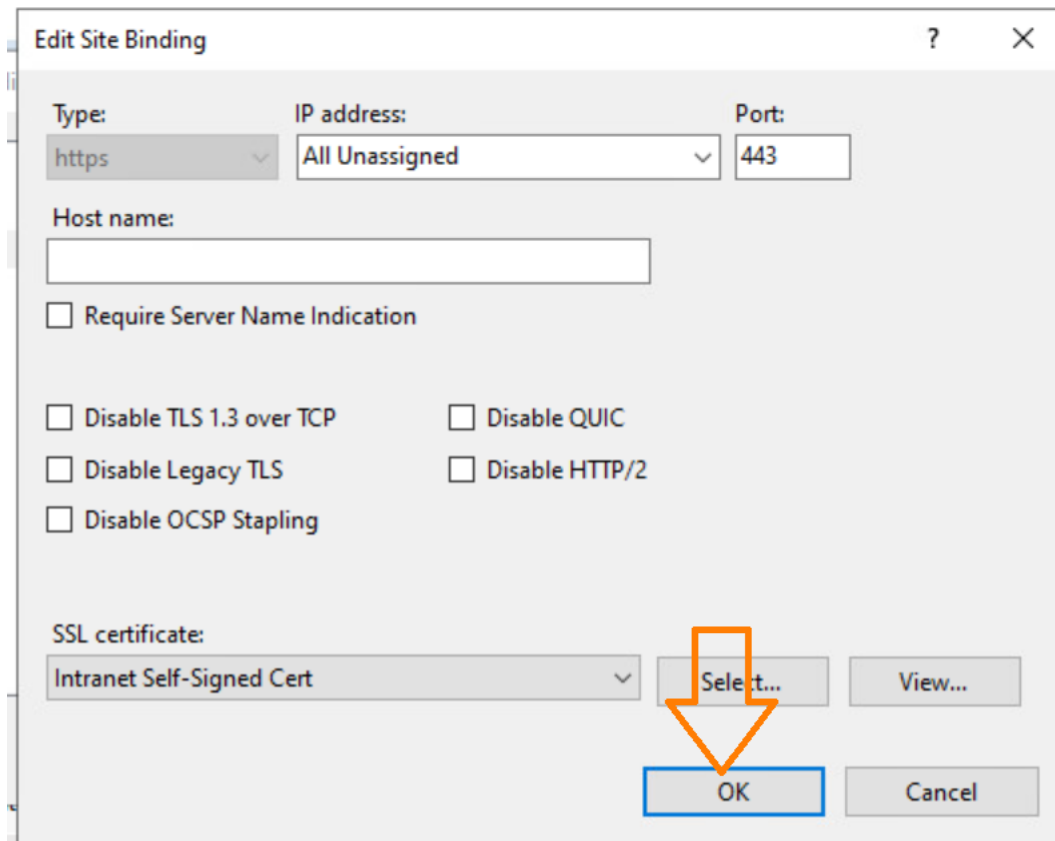

Setup Intranet Website 48 Bij Server Certificates in de IIS Manager zien we nu dat ons Self-Signed Certificate er staat.

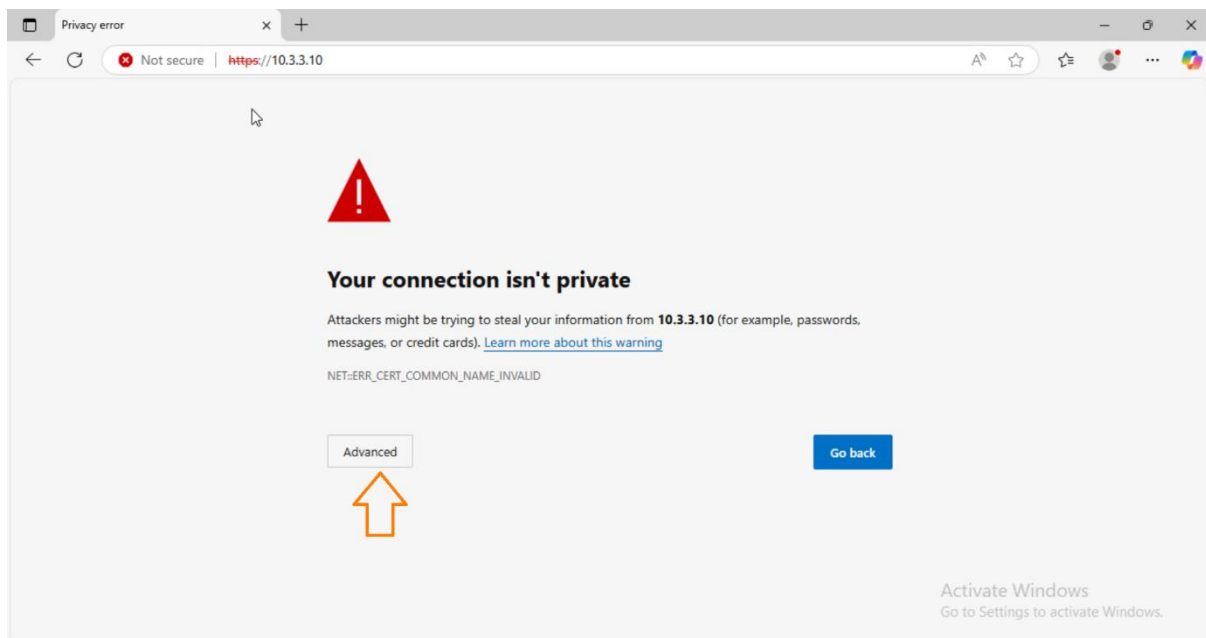

Setup Intranet Website 49 Rechtsklik op "Default Web Site" en klik op "Edit Bindings".

Setup Intranet Website 20 We gaan nu een https connectie toevoegen en ons certificaat verbinden. Klik op "Add".

Setup Intranet Website 51 Bij "Type" selecteren we https, IP address laten we op "All Unassigned". Bij SSL certificate selecteren we het certificaat dat we hebben gegenereerd via powershell. Klik daarna op "OK".

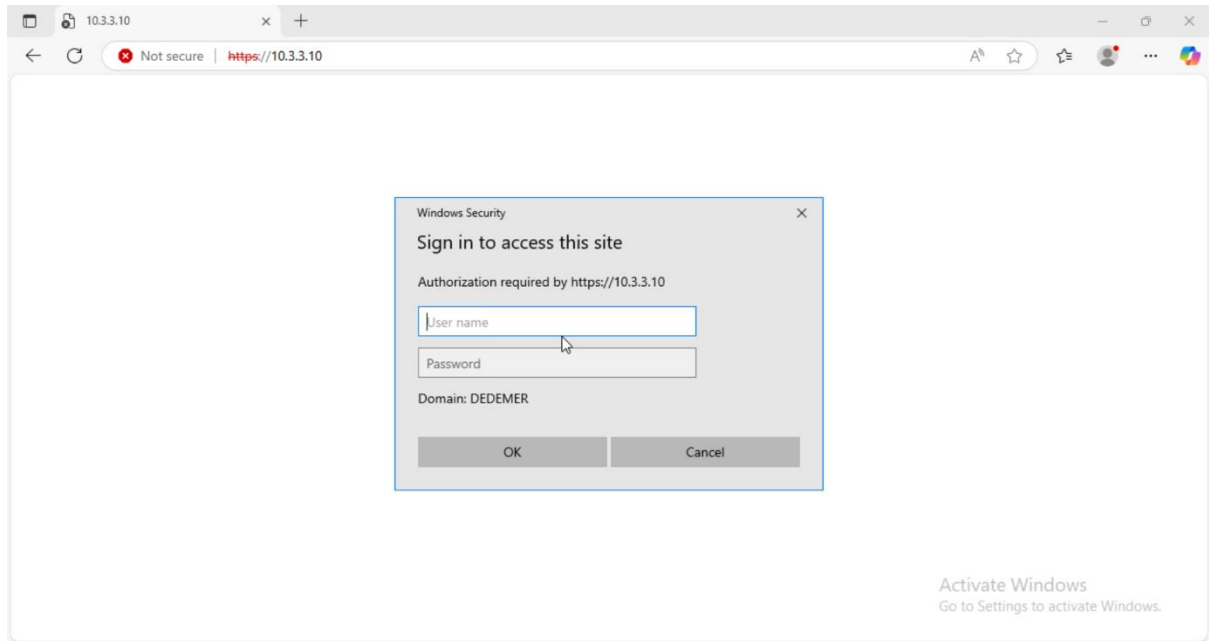

Setup Intranet Website 52 Surf nu terug naar het ip van de IIS server, deze keer over HTTPS.

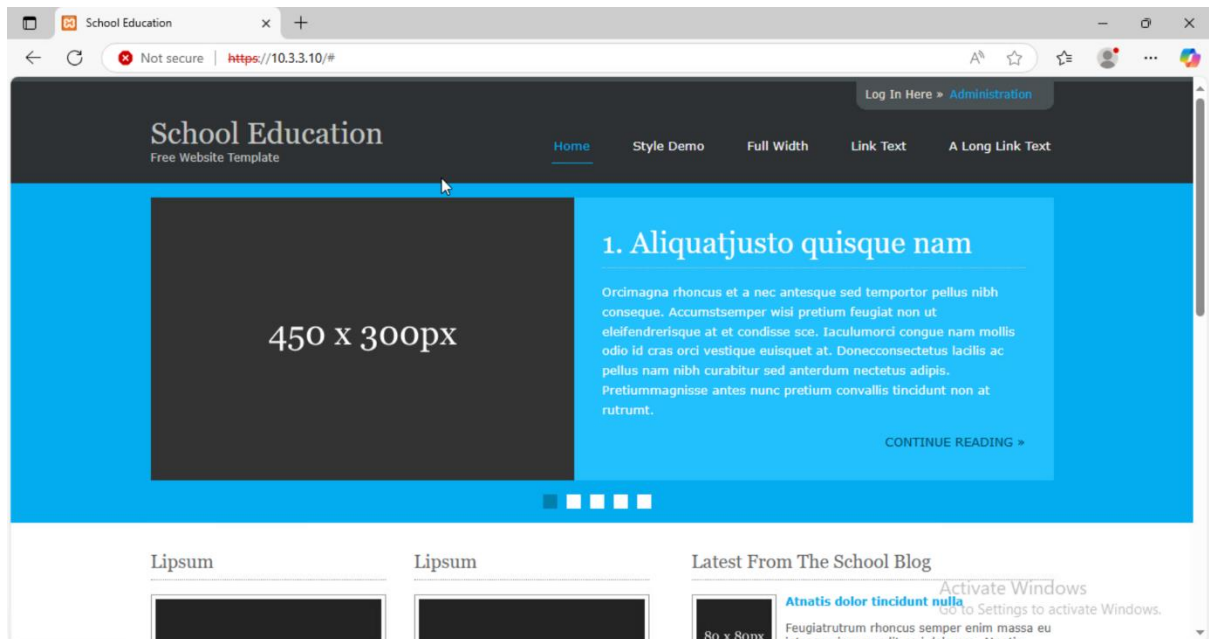

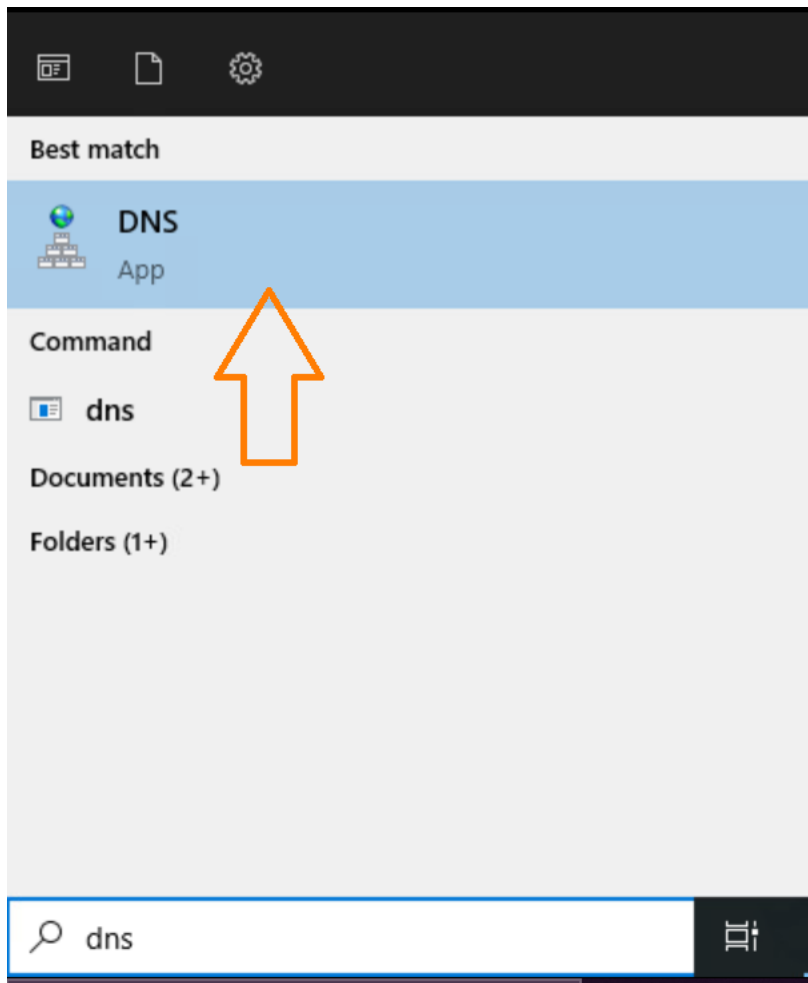

Setup Intranet Website 53 Continue naar de website

Setup Intranet Website 54 Geef de credentials in van een gebruiker die rechten heeft voor de website.

Setup Intranet Website 55 De website is nu succesvol ingeladen over HTTPS. Ons SSL certificaat is geldig.

Setup Intranet Website 56 Als volgende stap gaan we een nieuwe DNS Forward Zone instellen voor onze intranet site. Ga naar de zoekbalk en zoek voor de DNS service.

Setup Intranet Website 57 Rechterklik op "Forward Lookup Zone", en selecteer "New Zone".

New Zone Wizard

**Zone Name**  
What is the name of the new zone?

The zone name specifies the portion of the DNS namespace for which this server is authoritative. It might be your organization's domain name (for example, microsoft.com) or a portion of the domain name (for example, newzone.microsoft.com). The zone name is not the name of the DNS server.

Zone name:  
intranet.dedemer.be

< Back Next > Cancel

Setup Intranet Website 58 Als DNS Zone Name kiezen we intranet.dedemer.be. Dit is belangrijk voor het A record wat we binnenkort gaan aanmaken.

New Zone Wizard

**Dynamic Update**  
You can specify that this DNS zone accepts secure, nonsecure, or no dynamic updates.

Dynamic updates enable DNS client computers to register and dynamically update their resource records with a DNS server whenever changes occur.

Select the type of dynamic updates you want to allow:

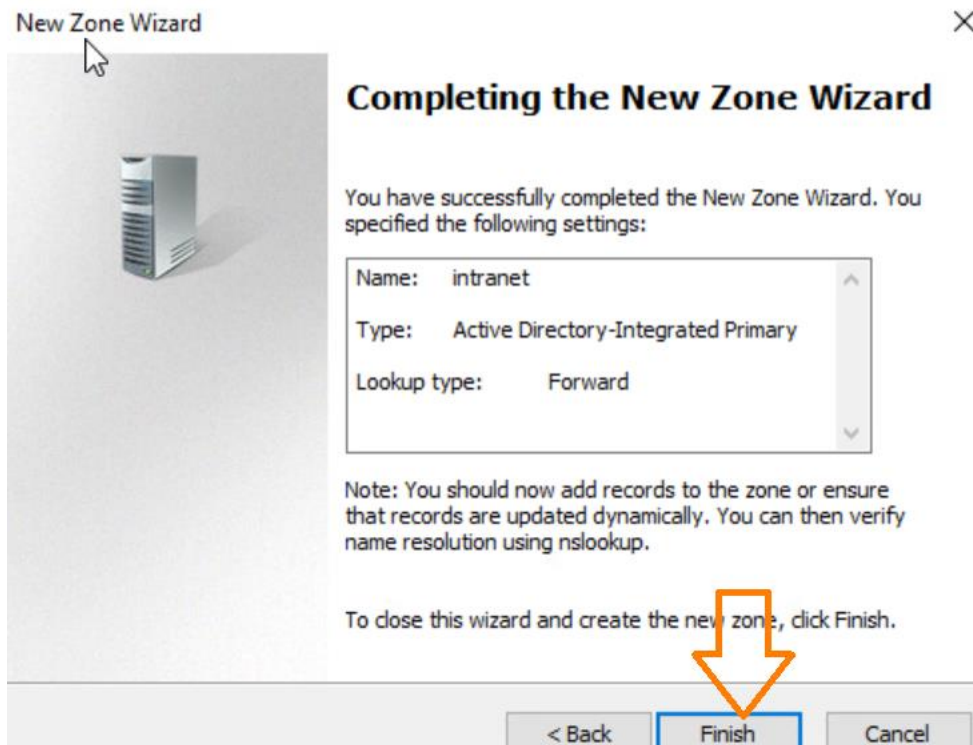

☒ Allow only secure dynamic updates (recommended for Active Directory)  
This option is available only for Active Directory-integrated zones.

☐ Allow both nonsecure and secure dynamic updates  
Dynamic updates of resource records are accepted from any client.  
 This option is a significant security vulnerability because updates can be accepted from untrusted sources.

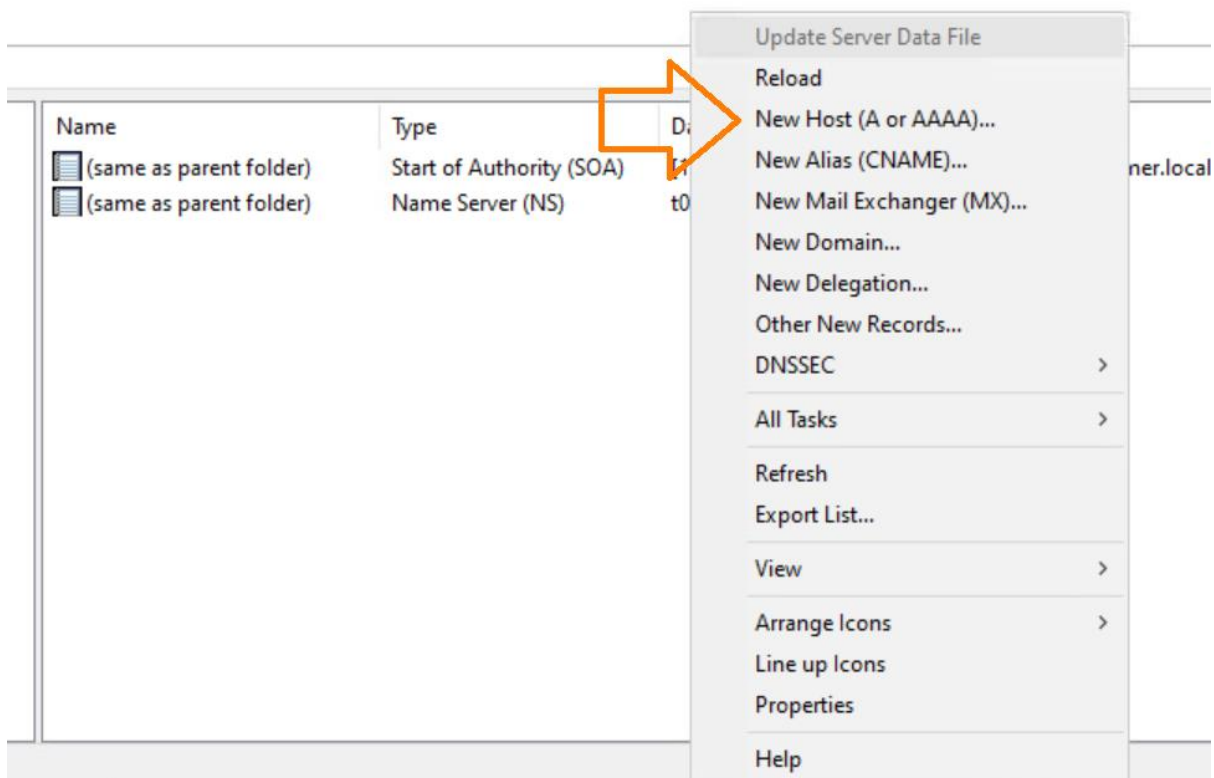

☐ Do not allow dynamic updates  
Dynamic updates of resource records are not accepted by this zone. You must update these records manually.

< Back Next > Cancel

Setup Intranet Website 59 Klik op Next.

Setup Intranet Website 30 Klik op "Finish". De zone wordt nu aangemaakt

Setup Intranet Website 61 We maken nu een A record in de nieuwe Zone aan.

New Host

Name (uses parent domain name if blank):

Fully qualified domain name (FQDN):  
intranet.dedemer.be.

IP address:  
10.3.3.10

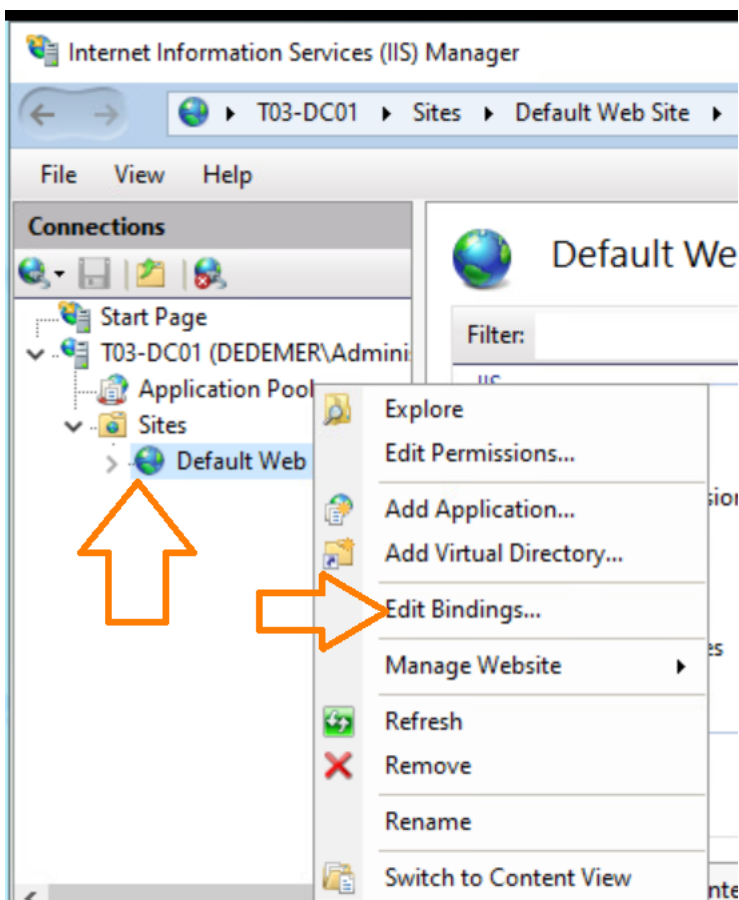

☒ Create associated pointer (PTR) record

☐ Allow any authenticated user to update DNS records with the same owner name

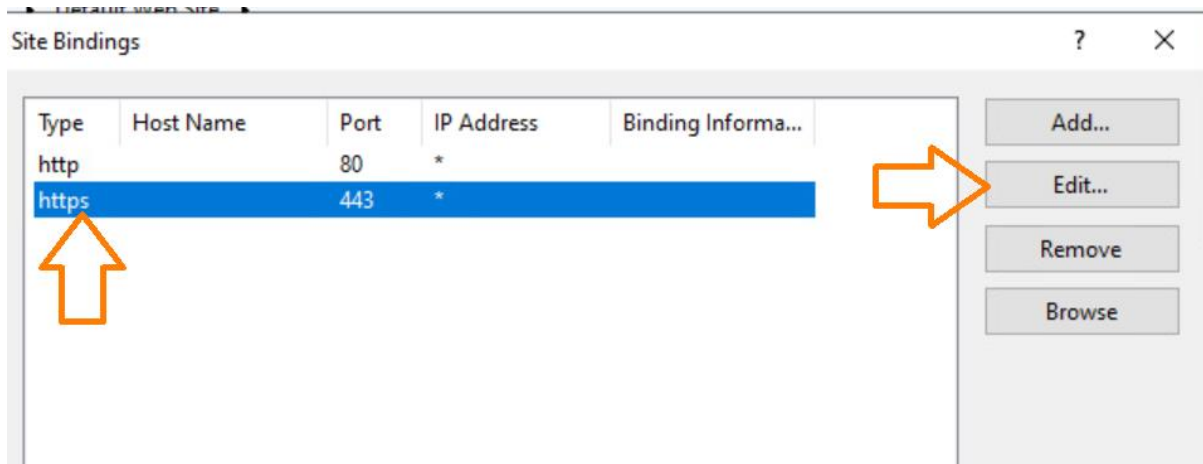

Time to live (TTL):  
0 :1 :0 :0 (DDDDD:HH:MM:SS)

Add Host Cancel

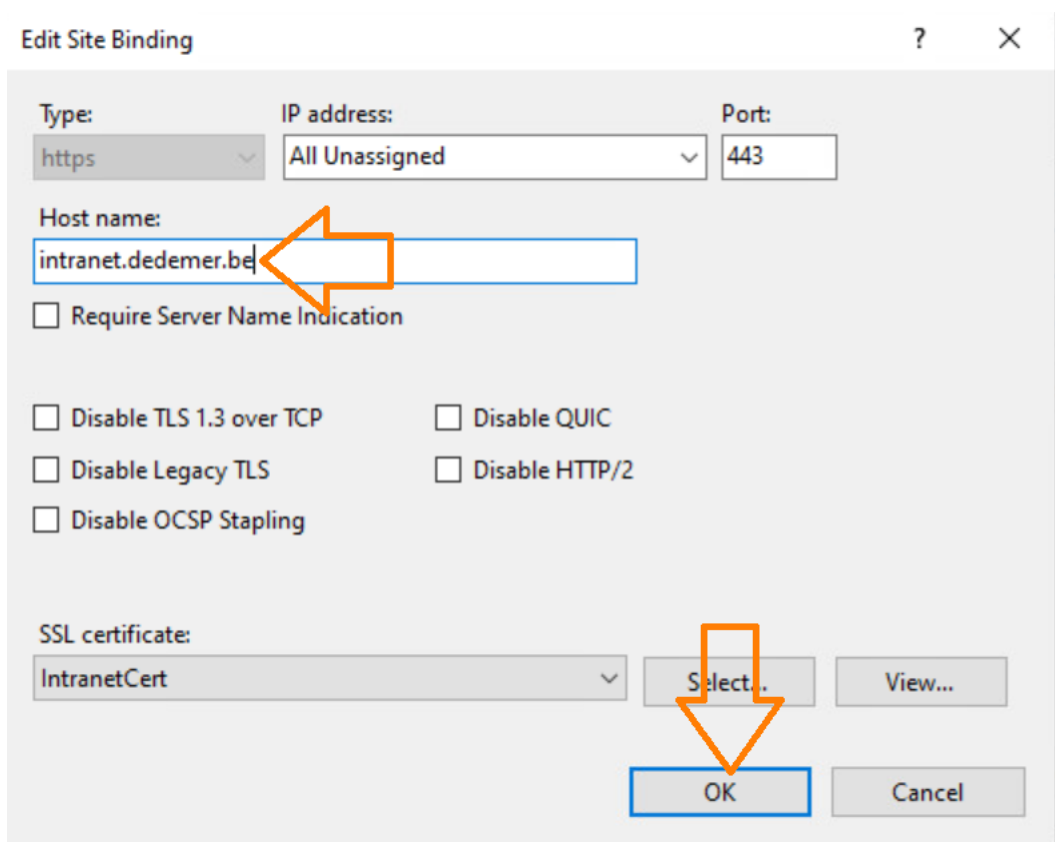

Setup Intranet Website 62 Het "name" veld laten we leeg. Als IP address stellen we het IP van de IIS server in. (de server waarop we nu aan het werken zijn)

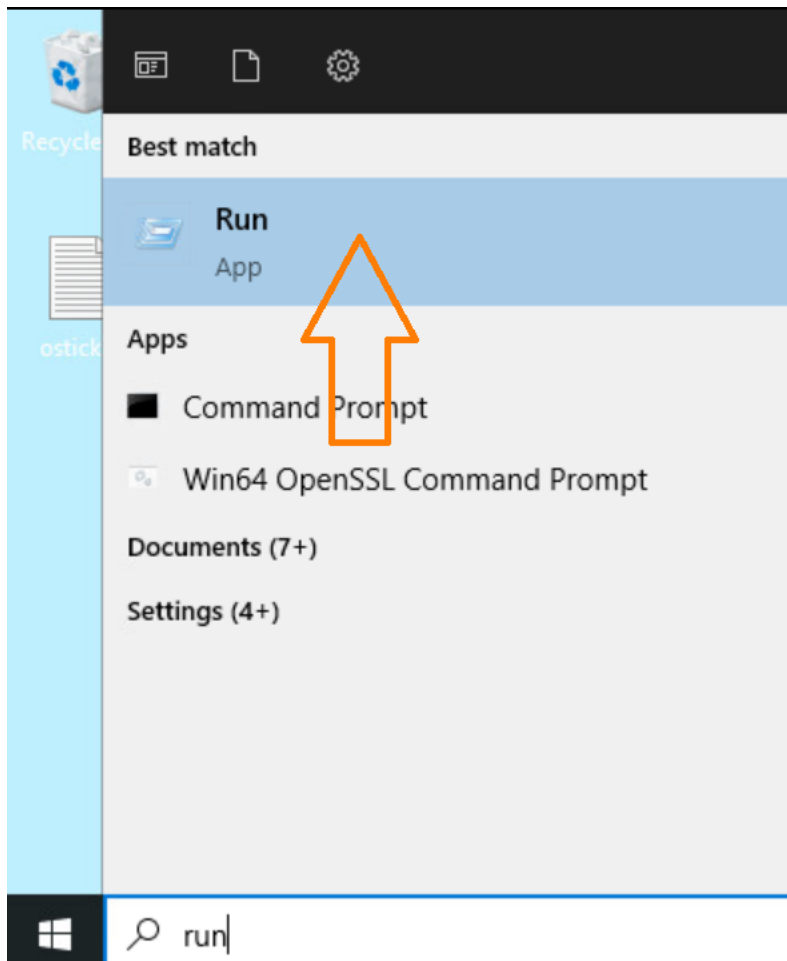

Setup Intranet Website 63 We gaan de bindings van de website nu terug aanpassen. Rechtsklik op "Default Web Site" en klik op "Edit Bindings".

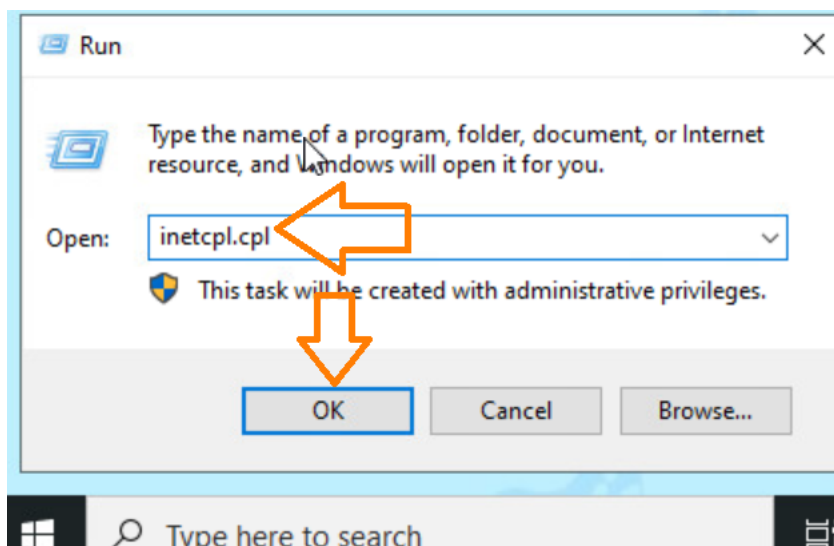

Setup Intranet Website 64 Selecteer het https veld en klik op "Edit"

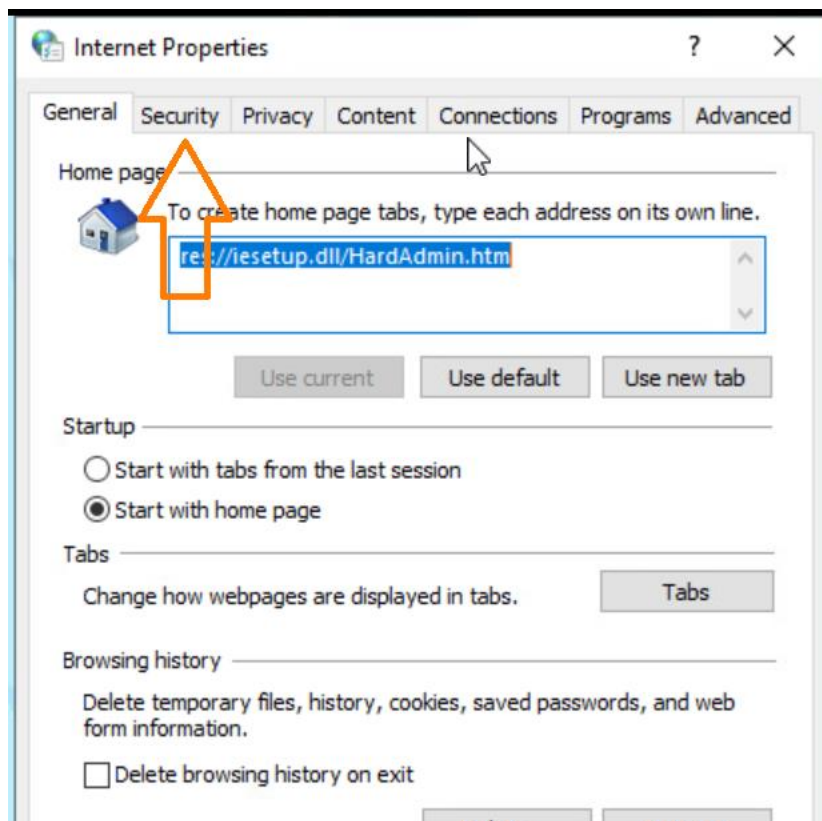

Setup Intranet Website 65 Als hostname geven we in "intranet.dedemer.be"

Setup Intranet Website 66 Ga naar de zoekbalk en zoek naar "Run"

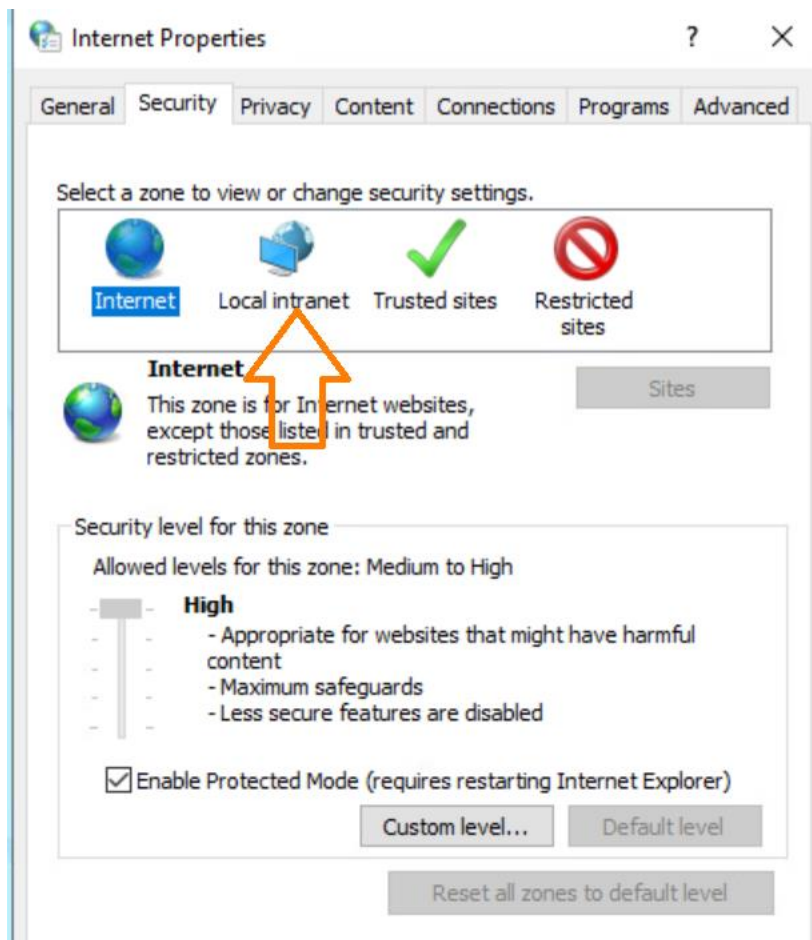

Setup Intranet Website 67 Zoek nu naar inetcpl.cpl

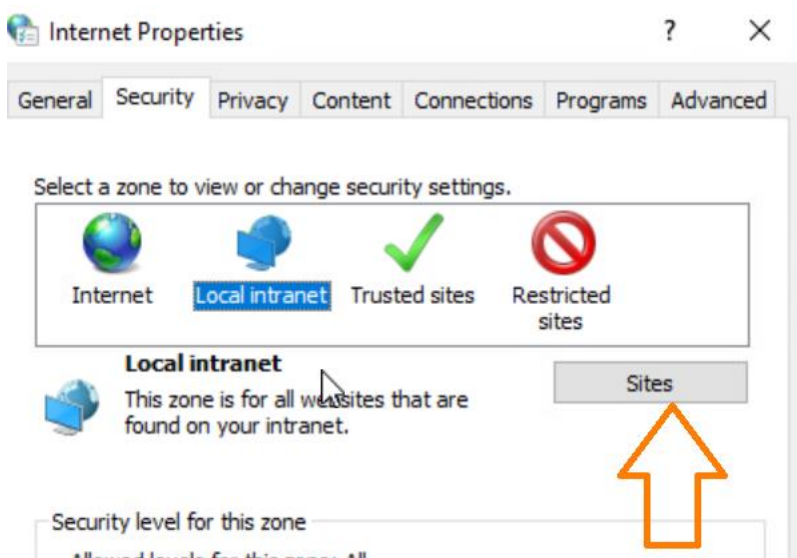

Setup Intranet Website 68 Ga naar de security tab.

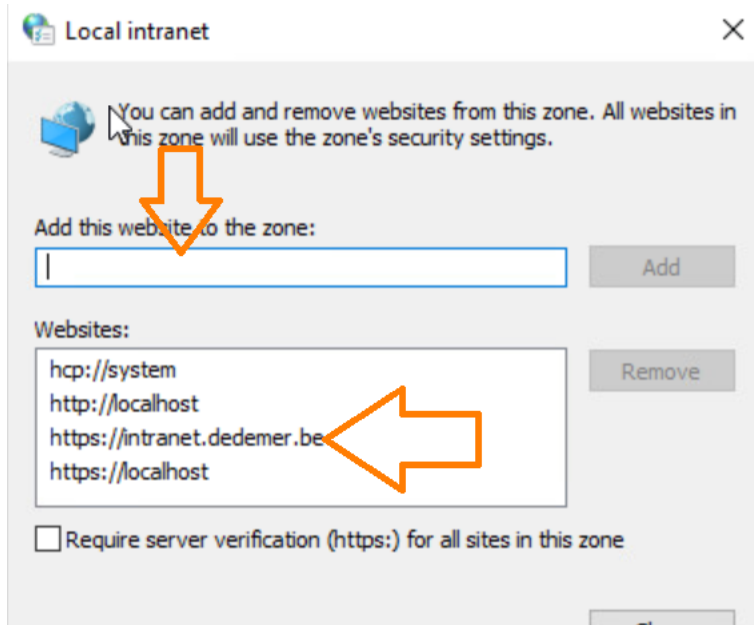

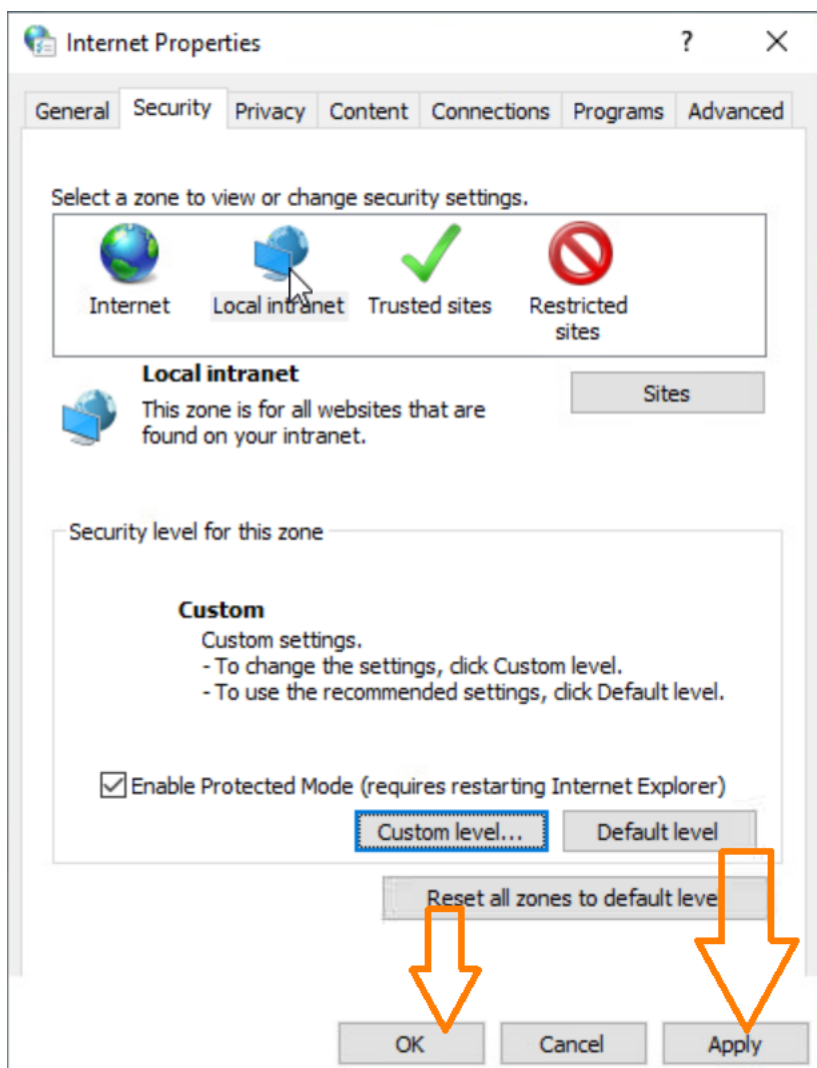

Setup Intranet Website 69 Klik nu op "Local Intranet".

Setup Intranet Website 40 Klik op "Sites"

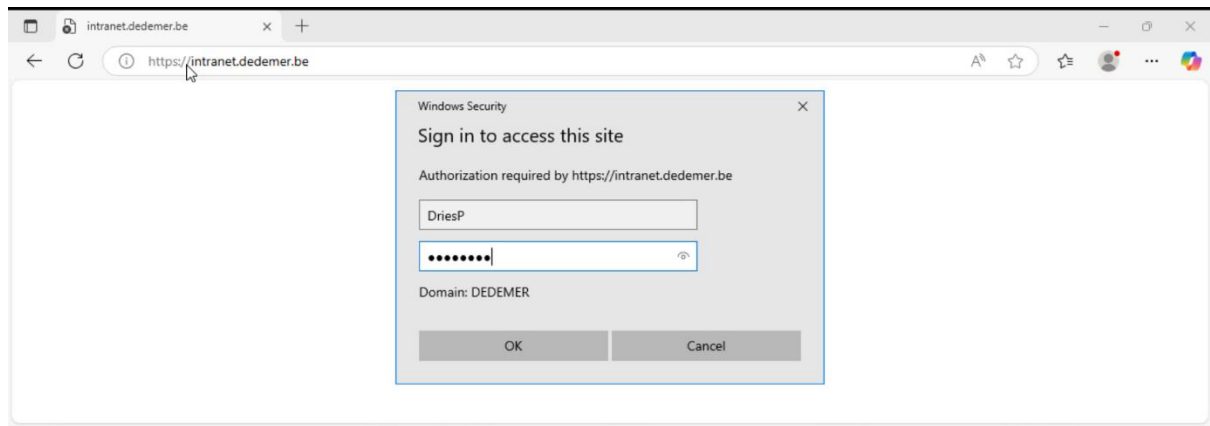

Setup Intranet Website 71 We voegen hier toe <https://intranet.dedemer.be>. Als HTTPS niet geblokkeerd wordt door de firewall, zal de website via de DNS-naam, en over SSL, nu beschikbaar zijn op de clients.

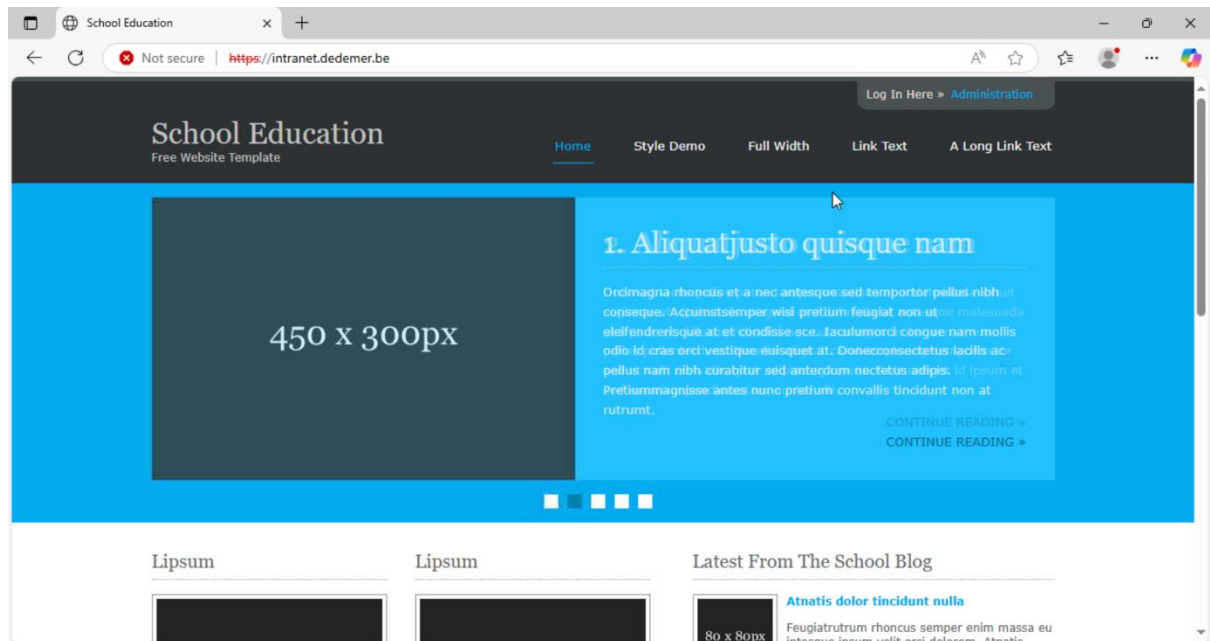

Setup Intranet Website 72 Klik op "Apply" en daarna op "OK"

https://intranet.dedemer.be

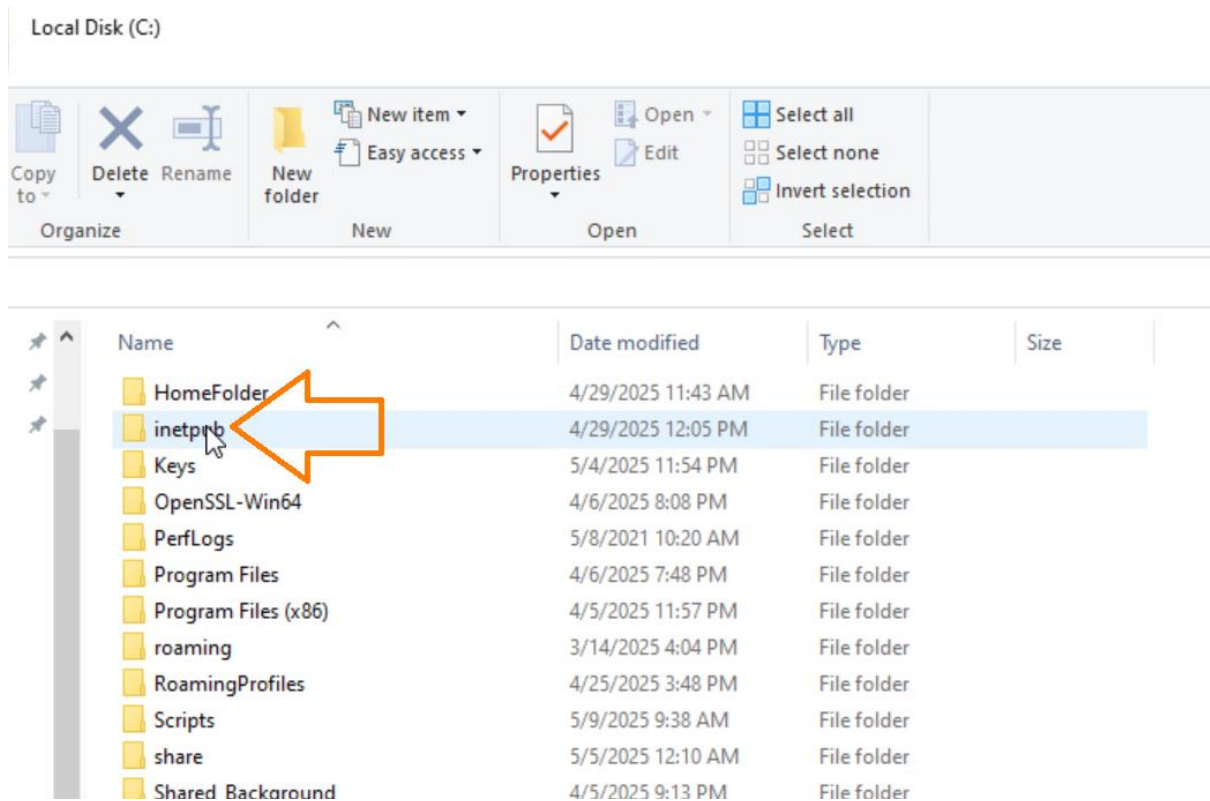

Setup Intranet Website 73 Surf nu naar de intranet site, via SSL en met de DNS naam.

Setup Intranet Website 74 We moeten nu onze credentials terug ingeven.

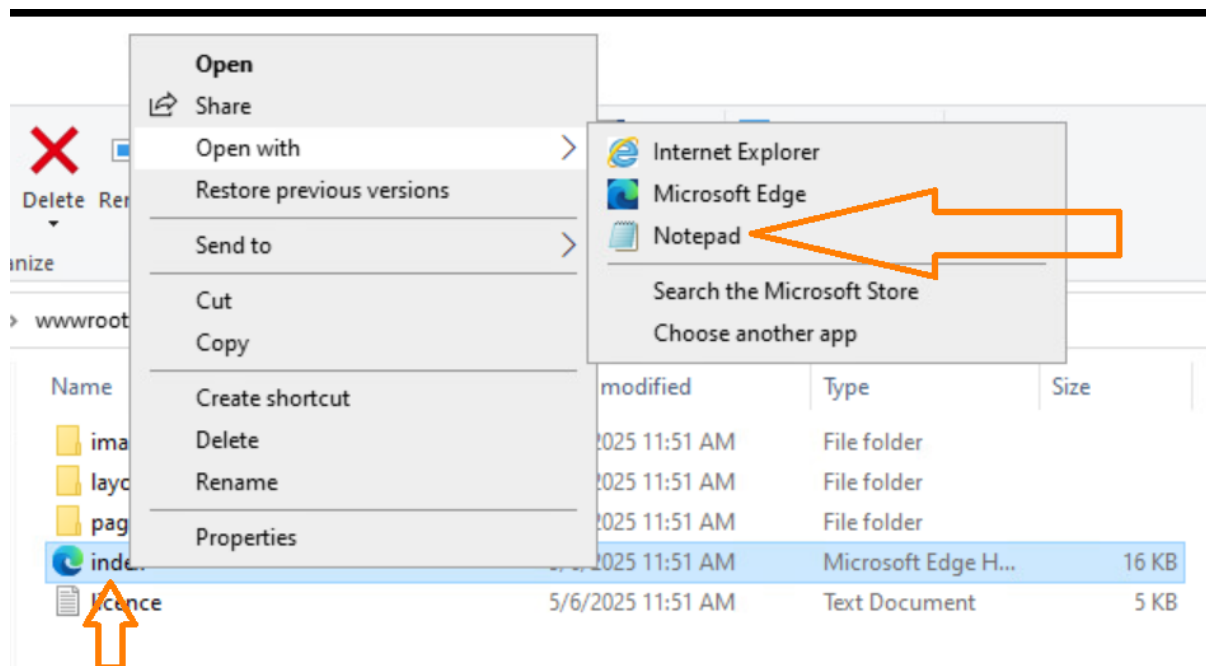

Setup Intranet Website 75 We komen nu op de webpage. De DNS koppeling is succesvol gelukt.

Setup Intranet Website 76 Als laatste gaan we nog de layout van de website zelf aanpassen. Ga naar de inetpub map op de C schijf.

Name	Date modified	Type	Size
custerr	4/29/2025 12:05 PM	File folder	
DeviceHealthAttestation	3/4/2025 11:08 AM	File folder	
history	5/9/2025 9:50 AM	File folder	
logs	4/29/2025 12:05 PM	File folder	
temp	4/29/2025 12:05 PM	File folder	
wwwroot	5/6/2025 11:52 AM	File folder	

Setup Intranet Website 77 Ga naar de "wwwroot" folder.

Setup Intranet Website 78 Rechtsklik op de index.html file en open het in notepad.

```

index - Notepad
File Edit Format View Help
<!-- Homepage Only Scripts -->
<script type="text/javascript" src="layout/scripts/jquery.cycle.min.js"></script>
<script type="text/javascript">
$(function() {
    $('#featured_slide').after('<div id="fsn"><ul id="fs_pagination">').cycle({
        timeout: 5000,
        fx: 'fade',
        pager: '#fs_pagination',
        pause: 1,
        pauseOnPagerHover: 0
    });
});
</script>
<!-- End Homepage Only Scripts -->
</head>
<body>
<div class="wrapper col0">
